

**TEST QUESTIONS FOR
CM Home Study Course
SUBSTANCE ABUSE AND DISABILITIES
Course Code: SAD**

16 Hours for CRC, CCM and CDMS
16 Hours for California RN Continuing Education

This course does not qualify for NBCC hours credit.

No partial credit will be given by CM Home Study. Please note that different certifying organizations may approve different credit hours/CEUs for this course.

Please include your certification/licensure title(s) and corresponding number(s) on your registration form. After you return the Registration and Answer Sheet Form with 75% or higher correct answers and the registration fee, a certificate verifying your completion will be mailed directly to you for your submission to your certifying or licensing organization.

Note: Not all courses have the same approvals. **BE SURE THAT THIS COURSE HAS THE APPROVAL FOR THE CREDENTIAL/LICENSE WHICH YOU NEED.** Refer to the approvals listed at the top of this page and to our website “approvals” section for details. Certificates verifying completion are subject to any changes, limitations or restrictions by the professional certification/licensure organization granting continuing education approval. Some organizations restrict the number of home study credits. It is your responsibility to determine if any restrictions apply to your credential.

Based on the text material *Substance Use Disorder Treatment For People With Physical and Cognitive Disabilities*, TIP Series 29, Dennis Moore, Ed.D., et al, U.S. Department of Health and Human Services, select the best answers to each of the following questions.

Based on the section “Executive Summary and Recommendations”, select the best answer to each of the following questions.

1. Treatment programs have _____ to make treatment for clients with coexisting physical and cognitive disabilities as effective as possible.
 - a. a legal responsibility but not an ethical responsibility
 - b. an ethical responsibility but not a legal responsibility
 - c. a legal and ethical responsibility

2. Which of the following are accommodations for people with coexisting disabilities in treatment for substance use disorders:
 - a. adjusting counseling schedules
 - b. providing sign language interpreters
 - c. suspending “no-medication” rules
 - d. any of the above

3. Which of the following is a recommendation for screening for disabilities:
 - a. if there are forms to be completed as part of intake processing people who are blind should be offered a braille format but not audiocassette.
 - b. when screening for people with cognitive disabilities it may help to use props such as different glass or bottle sizes

 - a. should assume
 - b. should not assume

18. With a person using a wheelchair, a provider should touch any adaptive equipment:
 - a. only with permission
 - b. any time the provider thinks it might help the person

19. Which of the following is a recommendation in screening for disabilities:
 - a. assess the level of abilities
 - b. assess the level of functioning
 - c. both a and b

20. An individual with a functional limitation such as an inability to read may seem indifferent to achieving treatment goals. The individual may actually have difficulty:
- processing information
 - retaining information
 - both a and b
21. Which of the following is true of memory problems such as those resulting from TBI:
- they may be hard to detect initially
 - a person might appear to be comprehending a vast amount of new information
 - a person might not retain the information even until the following day
 - all of the above
22. The use of cocaine and crack _____ mask clinical depression.
- can
 - will never
23. In the case example of John, which of the following may be issues that need to be addressed:
- reading problems of written material
 - attention problems in group treatment
 - possible difficulties with awareness and problem solving
 - all of the above
24. When conducting an intake interview with an individual with a physical disability:
- wheelchairs should fit beneath the table surfaces
 - interviewers should try to place themselves so that they are no higher than the person being interviewed
 - interviewers should attempt to gauge when clients are becoming fatigued
 - all of the above
25. When interviewing an individual with chronic pain, which of the following is recommended:
- periodically inquire how the individual is doing and offer to take breaks
 - rush through the interview even if very important information is neglected

26. Which of the following should be included in psychosocial history:
- a. whether a person has had skills training
 - b. when the training took place relative to the history of the substance abuse disorder
 - c. both a and b

Based on Chapter 3, select the best answer to each of the following questions.

27. Which of the following are recommendations for treatment planning and service delivery:
- a. revise treatment plans to accommodate the needs of people with coexisting disabilities
 - b. understand how an individual feels about her own disabilities
 - c. discussions of how a person with a disability uses avoidance strategies in daily life
 - d. all of the above
28. Treatment plans for people with coexisting disabilities should be flexible enough to take into account changes that may occur in a person's condition.
- a. true
 - b. false
29. Chronic bladder infections:
- a. are rare in persons with spinal paralysis
 - b. are affected by alcohol consumption
30. Autonomic hyperreflexia is a nervous system reaction that leads to a rapid and sometimes fatal rise in blood pressure.
- a. true
 - b. false
31. Persons with spinal cord injuries who consume substances to the point of intoxication _____decubitous ulcers of the skin.
- a. rarely experience
 - b. often experience

32. Clients with TBI should be made aware of the affect of alcohol on their seizure threshold.
- a. true
 - b. false
33. Making a trial run to the site of an Alcoholics Anonymous (AA) meeting during a less busy time of the day is an example of an adjustment in treatment for a person with a physical disability.
- a. true
 - b. false
